

Duplex Exhaust Systems

The advantages of Grand Rock's Duplex systems

The Grand Rock Duplex exhaust system with top stacks can be shipped ground! This means that shipping damages are less likely to happen. Shipping ground also eliminates the residential delivery fee when drop shipped, that's a savings up to \$130, when shipped LTL.

The Duplex exhaust system also provides ease of replacement if product does get damaged while in transit or after installation. This is also another cost savings for you only replacing the section that is damaged.

The Duplex exhaust system always qualifies for free freight!

7" and 8" kit options are available, along with choices of 52" or 55" spool pipes!

Distributors can inventory 1 or 2 exhaust kits, along with several stack options, giving them almost any look a customer could ask for.
