Kenworth Aerocab Exhaust

For the 5" system, remove the following: Muffler inlet elbow, muffler, Y pipe, 61" chrome pipes behind heat shield.

Replace with our Clamp and Bolt parts and make more profit!

Remove Restrictive Stock Exhaust

Install our 5" QP/Aero System for improved MPG and performance.

Our “stack” pipe is the same length as the factory pipe behind the heat shield. Inside is our patented 6" QP Muffler. This part is aluminized and hides behind the factory Aero shield. Most factory shields will bolt onto our brackets, no cutting or modifying is necessary.

Use your existing 5" top stacks and lower elbows.

Available For Both Single And Dual Muffler Applications

PACCAR OE Replacement Stainless Flex

- 304 Stainless Steel Construction
- Moves easily in both compression and expansion
- Torsional Movement (twists)
- Double wall construction is virtually leak-free & low emission
- In-between lengths to fit any flex application
- Eliminates cutting
- Easy installation
- Individually boxed with installation instructions
- Longer life than other flex types
