

Kenworth AeroCab[®] 5" Replacement Aftermarket Elbows

Seamless One Piece Design Prevents Premature Rusting

Whether you manage one truck or many, we understand that high quality products that reduce downtime are important in maintaining your fleet. And, our 5" replacement elbows are built with these qualities in mind. Often, aftermarket elbows are constructed using two separate pieces of exhaust tubing, welded together. Rust often accumulates at the weld spot, resulting in the need for early replacement and increasing downtime. Grand Rock's aftermarket 5" elbows are built on our CNC bender and incorporate a seamless one piece design developed to prevent premature rusting.

Benefits:

- Seamless one piece design prevents premature rusting
- Increased product life
- Made in America

Grand Rock Part Numbers:

- KW-18615 LC & RC
- KW-18616 LC & RC
- KW-1270 LC & RC
- KW-1271 LC & RC
